

How to apply Sticky-back signs

You will need:

- Masking tape
- Anything with a flat straight edge e.g. ruler, credit card, spatula
- Measuring tape or ruler

Application steps:

- 1** Clean your divider surface and ensure it is dry before commencing application
- 2** For collection dividers – ensure your sign is on the appropriate side of your collection divider. For slimline dividers- ensure rounded back corners are the top.
- 3** Use one piece of masking tape across the top of the sign to attach it to the divider.
- 4** Ensure that the sign is straight by measuring to the edge of the divider.
- 5** Flip up the sign and remove the backing paper. The masking tape is now working as a hinge.
- 6** Slowly lower the sign and working from top to bottom firmly press down on the sign face (with straight edge instrument) to smooth out any bubbles as you lower the sign.
- 7** Work any bubbles to the nearest edge with your straight edge tool.
